The art of measuring the complete air pollution in a large urban area as a function of time. This paper evaluates new tools available in the air quality assessment domain and their use for the detection of the local/regional air pollution contribution to the more widespread regional/local air pollution levels. A decision support systems for air pollution is made from this

analysis. This paper presents the results of a first stage of the development, where a 2-year study is being conducted in the city of Guangzhou, China. The study has two components: One is to detect and evaluate the pollution contribution to the regional/local levels through analyzing the air concentration from on-site air samplers for each province, and the other one is to improve the accuracy

of this contribution by building a numerical model and using it to estimate the contribution to the regional and local levels. The pollution contributions are localized by using a geostatistical procedure. The various pharmacological approaches to the treatment of acute asthma are reviewed. The basic pharmacological mechanisms of bronchodilation are described. Although

phosphodiesterase inhibitors constitute the most widely studied class of drugs, certain beta-adrenoceptor antagonists with intrinsic sympathomimetic activity and theophylline are still used in some countries.

The relative and absolute importance of 5-hydroxytryptamine (5-HT) and histamine in the pathogenesis of bronchospasm is discussed. The use of

corticosteroids and xanthines as anti-inflammatory agents in acute asthma is described. The effects of anti-inflammatory agents on airway hyperresponsiveness, acute hypersensitivity reactions, and cell membrane alterations are discussed. The various immunomodulatory strategies to the treatment of acute asthma are outlined. The available data on the

importance of the various cytokines in acute asthma are discussed. Q: dynamically assign an array to a variable value in javascript I have an array and I want to assign it's value to an array variable. The code is

```
var stores = ['restaurant', 'restaurant', 'restaurant', 'restaurant', 'shopping', 'shopping', 'shopping']; var sales = []; for (var i=0; i
